DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by either one of Bazzle et al. 4,130,950 or Kim 4,771,556.

Bazzle et al. '950 discloses all the limitations of the claim including the following: a shoe having first and second lateral sides (sides of the upper and sole of the shoe pictured in Figure 1) and a bottom (bottom of the sole where spikes 11 protrude); at least one disc 23; the at least one disc being operatively connected to the first lateral side (by magnet 14) and above the bottom (see Figure 1) so that the disc will not engage a walking surface; the at least one disc being rotatable with respect to the shoe (the disc can be placed on the magnet and rotated).

Kim '556 discloses all the limitations of the claim including the following: a shoe having first and second lateral sides (see Figures, lateral sides are sides of the shoe upper and sole) and a bottom (bottom of sole that contacts the ground); at least one disc (3); the at least one disc being operatively connected to the first lateral side (see Figures) and above the bottom (does not allow for contact of disc with the ground) so that the disc will not engage a walking surface; the at least one disc (3) being rotatable with respect to the shoe (disc can be rotated when placed within the shoe).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over either one of the references as applied to claim 1 above in view of Spector 5,996,253 or Moumdjian 5,295,314.

The references as applied to claim 1 above disclose all the limitations of the claim except for the bottom having a sole with an inflatable chamber and pumping port. Spector '253 and Moumdjian '314 are each examples of shoes that have a sole with a chamber and pumping port that allows for the chamber to be inflated to the desired pressure to perform the desired cushioning of the impact of the user's foot with the ground. Therefore, it would have been obvious, to one of ordinary skill in the art at the time the invention was made, to place a chamber with an attached pumping port, in the sole of either one of the references as applied to claim 1 above, to give the user the ability to adjust the cushionability of the shoe for personal comfort.

5. Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over either one of the references as applied to claim 1 above. The references as applied to claim 1 above disclose all the limitations of the claims except for multiple discs and the discs being of different designs. Showing that the disc of Bazzle et al. '950 is different than that of Kim '556, it would have been obvious, to one of ordinary skill in the art at the time the invention was made, to make discs of different designs to allow for the user to choose what they wanted to display with each disc being interchangeable with the other.

Art Unit: 3728

Allowable Subject Matter

6. Claims 11-20 are allowed over the prior art of record.
7. Claims 2-5 and 9-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and are cited on form 892 enclosed herewith.
